HHL TECHNOLOGY
VITAL
PROTECTION

Keep the bugs at bay

Vital Protection is a textile treatment that's really handy in malaria areas and similar high-risk places. It repels mosquitoes, fleas, ticks and other bugs and lasts up to 30 washes. You can apply it to clothes, bedding, tents and other textiles for long-lasting insect, microbial and bacterial protection. Simply spread the garments out on a flat surface, spray generously and let it dry for at least an hour before wearing. It's quick and easy and you don't have to worry about putting strange-smelling chemicals on your skin. *Getaway* photojournalist Lisa Johnston used Vital Protection in Kruger (page 66) and wasn't bitten. www.vitalprotection.co.za

About Vital Protection

Vital Protection is a highly effective, market leading anti insect protection technology that can safeguard the user and fabric from biting insects like mosquitoes, midges, sand flies, fleas and bed bugs. Vital Protection will also inhibit odours and fabric degradation - 3 enviable, much sought after benefits in one vital product!

Vital Protection is suitable for most articles including outdoor textiles, home textiles, clothing, shoes, floor coverings, wall coverings, foam items and various plastic end uses. It is perfect for application on active, outdoor and sportswear and outdoor equipment (e.g. tents and sleeping bags) that will be used on adventure travels. In countries where mosquitoes and biting insects are prevalent, there is no limit for scope.

About Us

HHL Technology is an innovative leader in multi-functional fabric technologies. For over a decade, our extensive range of fabric applications have addressed the needs of an ever growing and demanding market and are embraced by some of the world's most recognised brand names in the active wear, outdoor clothing, outdoor equipment, home and commercial textile markets.

Whether you want your textiles protected from odour-causing bacteria, mould, fungi, a torrential rainstorm or biting insects, HHL Technology has the products you need to achieve added value and performance.

All our products use the most advanced technology available. They have been independently tested and are safe to both the environment and the user.

If you manufacture or buy a garment or piece of equipment with an HHL Technology logo, you can be sure that it will be fresher, healthier and more hygienic.

Product Overview

Our comprehensive range of products includes the following:

- PureTex Natural silver anti-microbial
- Armour+ Highly advanced rain and stain shield
- ArmourTex Advanced rain and stain shield
- BioTex Anti-fungal system
- BaseTex Essential fabric softening system
- Hygiene Protection Anti-microbial application
- Health Protection Anti-dust mite and anti-microbial application
- Vital Protection Anti-mosquito insect protection
